Disposition
Experts

Part of the

TROX

Family

Lifespan has been providing ITAD solutions to Corporations & Government departments across North America for 20+ years.

Data Security that Ensures **Highest Protection**

Lifespan is a responsible I.T. Asset Disposition leader with world-class expertise and tools to handle 100% secure Data Security, Destruction and Sanitization for all types of data storage devices.

AAA Certification

Lifespan's processes for data destruction meet the National Association for Information Destruction (NAID) AAA Certification requirements and comply with NIST 800-88, the current US Government standard for data destruction produced in conjunction with the Department of Homeland Security (DHS).

NAID certifies that a company meets all of the government, and industry best practice, standards. These standards include background checks of employees, data security training, technology and systems used, facility security, procedures for data handling and destruction, and all documentation for services provided.

Value Recovery That Maximizes

Return on Your IT Assets

Maximize returns on your unwanted technology products. With a remarketing partner like Lifespan, it's possible. Many unwanted technology assets still have remaining life and value, so our first priority is to help you recover some of your investment in these assets.

Lifespan's Remarketing and Investment Recovery Services

Our dedicated remarketing team knows the pulse of the I.T. equipment resale market. We have local, regional, national, and international wholesale/retail channels for all types of used technology.

As a Microsoft Authorized Refurbisher, we re-certify I.T. equipment and install new, genuine Microsoft licenses, increasing the value returned to your organization.

Environmental Stewardship that Supports

Responsible ITAD for Your Company

Environmental stewardship is the responsibility for environmental quality shared by all those whose actions affect the environment. In 2005, EPA laid out a vision for environmental stewardship recognizing it as a means to a more sustainable future.

R2 Certification

Lifespan’s commitment to environmental compliance and risk minimization for our clients is reflected in our R2 Certification. This accomplishment strengthens Lifespan’s position as a leader in responsible recycling services, environmental protection and international legal compliance.

R2 is a globally accredited, third-party audited certification program of SERI, and is a premier global environmental, worker health and safety standard for the electronics refurbishing and recycling industry.
